## SOL10WP Series 10 Watts Dual 5V USB Charger

### Features

- Practical, fast, clean solar energy
- Simple to use just plug and play
- Light weight compact foldable design
- Can charge smart cell phones, tablet PCs, cameras and other USB compatible mobiles devices
- Suitable for charging battery back up power banks
- Housed in weather resistant protective enclosure
- Sewn in rings for mounting of the solar charger
- Controlled dual 5V USB outputs
- Frosted surface on solar panels for better light absorption

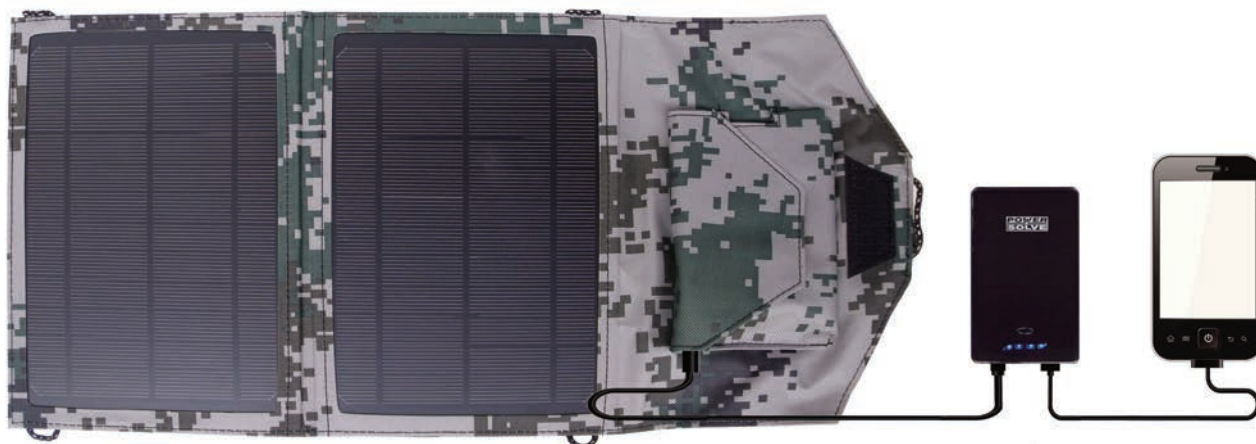

Dimensions: Open 540 x 260 x 25mm (including controller)

Dimensions: Folded 180 x 260 x 33mm (including controller)

### Electrical Specification

Max Power:	10 Watts	
Solar Cells:	>18% efficiency monocrystalline silicon cells	
Number of Panels:	2	
Output Voltage 1:	5VDC 1.6A from built in controller	} Max current is 1.6A total from both USB ports
Output Voltage 2:	5VDC 1.6A from built in controller	
Output Connectors:	Two standard USB output connectors	
Dimensions Unfolded:	540 x 260 x 25mm (including integral voltage controller)	
Dimensions Folded:	180 x 260 x 33mm	
Net Weight:	500 grams	
Colour:	Camouflage (other colours available subject to MOQ)	
Material:	Water resistant fabric	

Typical application showing solar panel charging power bank with mobile phone charged from power bank battery  
Note: Any of our power bank products can be used in conjunction with our solar chargers
